

LED flite™ Architectural Uplight Series

2000lm / Flite Housing

Project	Type
Notes	Quantity

Description

This is a medium-sized adjustable LED uplight fixture that gives you multiple options for lumen output and housing design. Our unique, low profile approach to thermal management is patent-pending, and allows flite™ units to support higher lumen packages in smaller, lighter weight fixtures. A variety of integral and remote drivers are available for all popular dimming options. Standard illumination packages range from 2,000 to 4,000 lumens.

Physical

- The heart of the flite™ system is a passive-cooling plate that acts as heatsink, radiator and LED platform
- Typically in a rectangular form, the cooling plate can take any shape to suit a specifier's needs
- Cooling plate is enclosed within the reflector housing
- The LED holder rotates about its horizontal axis to adjust distribution in the vertical dimension
- Positive internal locking
- Standard uplight units offer outputs of 2,600, 4,000, 5,200 and 6,500 lumens (output is increasing with advancing technology)
- Reduced weight affords easy wall mounting
- Custom units present nearly unlimited opportunities to support much greater lumen packages with a variety of drivers
- Integral or remote drivers available
- Driver selections available for compatibility with any dimming or control system protocol
- Fixtures are fully wired and thermally protected
- Any number of forms will house the flite™ system
- Use your imagination!

Finish

- All exterior finishes available (painted, polished, brushed)

Electrical

- 115/120V, 277V, 50/60Hz
- 90C thermal protection

Available Dimming

- Drivers available — Non-Dimming • Forward Phase 2-wire (Lutron Hi-Lume LTEA4U1UKN-JA105, "LUT2") • Lutron ecoSystem (LDE14U1UKN-GA105, "LUT4") • 0-10V (EldoLED, "ELD"), DMX (RDM) • DALI control protocols.
